★ Honestly, open to anything

- Title and level are negotiable — the team and the problem matter more

</> Software engineering

- Full-stack, platform, streaming or realtime systems work

📈 Data & analytics

- SQL, reporting and compliance tooling people act on

🔧 Ops, support, sales — whatever fits

- Ten years of sales and running my own company

- 7

OpenVibe services designed, built and operated solo
- 900+

HTTP routes across the OpenVibe network
- 5

Payment processors unified at PowerChat
- 1,000+

SOX-compliance IRDRs researched at Amazon
- 10+

Years running my own company

👤 Profile

Full-stack engineer with **10+** years shipping production systems and a habit of owning them end to end. I designed and run **OpenVibe**, an open live-streaming and tools network of seven Node services behind one identity provider. At **PowerChat** I turned the product into an **OAuth2** platform and rebuilt its payments across five processors. Before that I ran **SOX**-compliance analytics at **Amazon**, shipped autonomous research agents analysts used daily, and spent three years in sales at **Verizon Wireless** — district top performer, promoted to Assistant Manager, coaching 4-8 reps. I've also run my own company, **GameServerStats**, for **10+** years. I'm genuinely open to where that combination fits: engineering, platform, analytics, ops or something in between.

📅 Experience

</> Software Engineer (Contract) • Aug 2026 – Present

PowerChat · Remote
Creator monetization platform: tips, alerts, overlays, TTS and chat integrations across Twitch, Kick, YouTube and Rumble. I own large platform programs end to end on the v2 TypeScript rewrite.

- Designed and shipped the Developer API platform end to end: **PowerChat** became an **OAuth2** authorization server with scoped consent, token lifecycle, HMAC-signed webhooks and an inbound API, so third-party apps act as pseudo-platforms feeding chat, view counts, follows, subs, currency and tips into overlays. Re-implemented **Streamlabs** as the first official app on the new framework.
- Rebuilt the payments program as one system: a provider-agnostic charge rail with five adapters (Stripe Connect, Square, PayPal, an NMI card vault and NowPayments crypto), append-only ledgers where double-crediting is structurally impossible, Tipalti payouts, recurring Pro and viewer-subscription billing, signed webhooks per provider and an admin reconciliation surface.
- Delivered **400+** commits and roughly 300k changed lines in the first five weeks across integrations, payments and Rumble connection work, backed by **240+** governed backend integration tests and **1,700+** frontend unit tests, with lint, typecheck and empty-database migration proofs in CI.

Stack TypeScript · Node.js · Express · React · Prisma · PostgreSQL 17 · Redis · BullMQ · OAuth2 · Stripe · Square · PayPal · NMI · Tipalti · Docker · GitLab CI

🚀 Founder · Architect · Sole Engineer • 2022 – Present

OpenVibe · openvibe.live and 20+ domains
An open, community-run live-streaming and tools network. Started in 2022 as a streaming site, re-architected in 2026 into seven services behind one identity provider. I design, build, deploy and operate all of it.

- Architected the network as seven Node services with formal inter-service contracts: **OpenVibe.Live** (streaming), **.Network** (OIDC/OAuth2 identity, OpenCoins wallet, notifications, themes), **.Media** (multi-tenant media API), **.Tools** (169-tool suite), **.Games** (Scraplandia), **.Community** (pastes) and **.Sites** (13 front-page domains). About 363k lines, **900+** HTTP routes, one operator.
- Built the streaming core: RTMP, WHIP and WebRTC-SFU ingest (mediasoup, werift), ffmpeg restream to Twitch, YouTube, Kick and SRT, VOD and clip pipelines with local → Backblaze B2 → Cloudflare R2 tiering, chat and moderation, a three-currency economy, **PowerChat** and RobotStreamer integrations, local whisper.cpp captions with LLM translation in about 21 languages, and AI clip and moment jobs on a provider-agnostic, budget-metered LLM client.
- Ran it like a product team: systemd socket-activated zero-downtime deploys (measured 90 of 90 requests served through a restart), a deploy script that classifies each change and supports rollback, a headless-Chrome performance harness with interleaved A/B runs (home page CLS 0.83 → 0.03, warm FCP 1066 → 550 ms), and a dry-run migration suite plus cutover runbook that moved users, coins and 22 concurrent players with no downtime.

Stack Node.js · TypeScript · Express · SQLite (WAL) · mediasoup · werift · ffmpeg · whisper.cpp · Babylon.js · Havok · OAuth2 / OIDC · RS256 JWT · nginx · systemd · Cloudflare · B2 / R2 · Prometheus-style diagnostics

Experience (continued)

Data Analyst — ICQA

2024 – Mar 2026

Amazon · PAE2 · Arlington, WA

- Owned the **SOX**-compliance IRDR workflow: personally researched **1,000+** inventory discrepancies and built the data systems and reporting that satisfied Sarbanes-Oxley audit requirements.
- Built SQL and Excel reporting for inventory accuracy and defect visibility; delivered dashboards, recurring leadership reports and a network-wide quality recap deck.

Amnesty Floor Monitor — Amazon Robotics

2023 – 2024

Amazon · Robotics launch site

- Monitored the **Amazon** Robotics floor during launch operations: enforced amnesty zones, cleared obstructions and kept pod and drive-unit flow safe.
- Investigated recurring pod, drive and workstation defects, documented patterns and escalated to RME and operations leadership to drive process fixes.

Assistant Manager / Sales Representative

2020 – 2023

Verizon Wireless

- Ranked among the district's top performers, consistently exceeding monthly quotas across phones, plans, accessories, protection and financing.
- Promoted to Assistant Manager; coached a team of 4 to 8 reps through 1-on-1s, floor coaching and skill workshops, and ran opens, closes, inventory and escalations.

Founder · Developer · Systems Admin

• 2015 – Present

GameServerStats, LLC

- Built analytics platforms tracking **200,000+** live game servers: ingestion, search, ranking, dashboards and licensed partner APIs. Ranked first on Google for several major titles.
- Self-built and collocated 1U and 2U servers in datacenters; designed for scale and DDoS resilience and ran the whole LLC, from licenses and taxes to partner relations.

Earlier Technical & Business Work

2012 – 2015

Devolved · GModStore · eBay

- Built multiplayer game systems, monetized in-game economies and digital products sold through ScriptFodder and GModStore.
- Produced graphics, support docs, e-commerce listings and moderation workflows, and ran online communities at scale.
